
How effective are “Community Approaches” at protecting and improving health and well-being and reducing inequalities?

A Data Management Plan created using DMPonline

Creator: Anna Wilding

Affiliation: University of Manchester

Template: Wellcome Trust Template Customised By: University of Manchester

Project abstract:

In the recently published Long Term Plan (REF), NHS England set out its ambitions to champion ‘community approaches’ with the joint aims of improving health and reducing the demand on formal health and care services. These community approaches – related to community-led development – are underpinned by the idea that an individual’s situation can be improved by great social interactions and hence reduced loneliness. This PhD proposal will be organised as follows: 1. Do community asset programmes reduce health and well-being inequalities? 2. What are the health and well-being benefits of addressing financial indebtedness? 3. Do social prescribing programmes reduce isolation and loneliness and improve health and well-being?

How effective are “Community Approaches” at protecting and improving health and well-being and reducing inequalities?

Manchester Data Management Outline

1. Is this project already funded?

- No

2. If you will be applying for funding from multiple sources who else will you be applying to?

- Not applicable

3. Is The University of Manchester the lead institution for this project?

- Yes - only institution involved

4. What data will you use in this project (please select all that apply)?

- Re-use existing data (please list below)

Understanding Society (PubliclyAvailable)

General Practice Patient Survey (PubliclyAvailable)

English Longitudinal Study of Ageing (PubliclyAvailable)

5. Where will the data be stored and backed-up during the project lifetime?

- Dropbox for Business

6. If you will be using Research Data Storage, how much storage will you require?

- < 1 TB

7. If you have a contractual agreement with a 3rd party data provider will any of the data associated with this project be sourced from, processed or stored outside of the institutions and groups stated on your agreement?

- No

8. How long do you intend to keep your data for after the end of your project (in years)?

- < 5 years

Questions about personal information

Personal information or personal data, the two terms are often used interchangeably, relates to identifiable living individuals. Special category personal data is more sensitive information such as medical records, ethnic background, religious beliefs, political opinions, sexual orientation and criminal convictions or offences information. If you are not using personal data then you can skip the rest of this section.

Please note that in line with [data protection law](#) (the General Data Protection Regulation and Data Protection Act 2018), personal information should only be stored in an identifiable form for as long as is necessary for the project; it should be pseudonymised (partially de-identified) and/or anonymised (completely de-identified) as soon as practically possible. You must obtain the appropriate [ethical approval](#) in order to use identifiable personal data.

9. What type of person identifying information will you be processing (please select all that apply)?

- No sensitive or personal data

10. Please provide details of how you plan to store, protect and ensure confidentiality of the participants' information as stated in the question above

N/A

11. If you are storing personal information will you need to keep it beyond the end of the project?

- Not applicable

12. Sharing person identifiable information can present risks to participants' privacy, researchers and the institution. Will the participants' information (personal and/or sensitive) be shared with or accessed by anyone outside of the University of Manchester? This includes using 3rd party service providers such as cloud storage providers or survey platforms.

- No

13. If you will be sharing personal information outside of the University of Manchester, will the individual or organisation you are sharing with be outside the EEA?

- Not applicable

14. Are you planning to use the personal information for future purposes such as research?

- No

15. Who will act as the data custodian or information asset owner for this study?

myself

16. Please provide the date on which this plan was last reviewed (dd/mm/yyyy).

01/03/19

Data and software outputs

The data and software outputs your research will generate

N/A due to using Publicly Available data

When you intend to share your data and software

N/A due to using Publicly Available data

Where your data and software will be made available

N/A due to using Publicly Available data

How your data and software will be accessible to others

N/A due to using Publicly Available data

Whether limits to data and software sharing are required

N/A due to using Publicly Available data

How datasets and software will be preserved

N/A due to using Publicly Available data

Research materials

What materials your research will produce and how these will be made available

N/A

Intellectual property

What IP your research will generate

Casual links of community approaches on health and well being through economic modelling

How IP will be protected

Due no patent being made due to type of research this will not be possible. The only manor to protect IP is through publications

How IP will be used to achieve health benefits

Dissemination of research to policy makers

Required resources

You should consider what resources you may need to deliver your plan and outline where dedicated resources are required.

software package - STATA
